

# What Good Is A Lead You Can't Follow?

Get the only engine analyzer with AutoSort™ leads.

Our new handheld EngineLink Analyzer's exclusive AutoSort leads take the guesswork out of DIS hook-up.

- Diagnostic messages like

"wide gap at spark plug #3,"

lead you right to the problem. • Use the

AutoTest to get a quick engine performance profile.

- Test distributor or DIS engines, sensors, and drivers for ignition, starting/charging and fuel-delivery problems. • All with no vehicle specific data needed. • Print results to most PC printers with our wireless I/R controller.

See our full line of diagnostic equipment at: [www.ferretinstruments.com](http://www.ferretinstruments.com)
